

SIT Group

# 630 EUROSIT PLUS

MULTIFUNCTIONAL GAS CONTROL

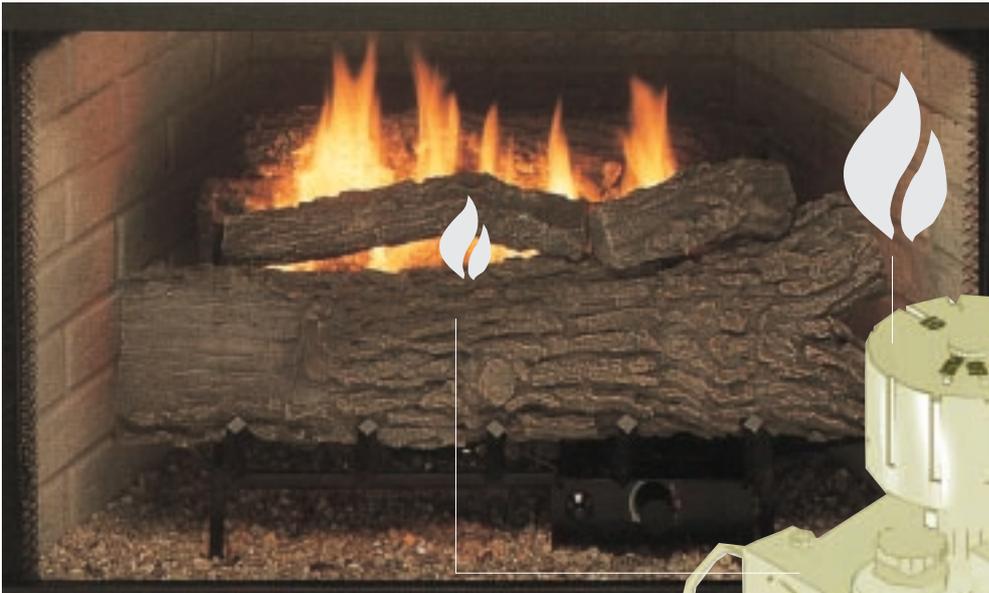

**TWO INDEPENDENT OUTLETS:**

**MAIN OUTLET CONTROLLED BY THE THERMOSTAT**

**AUXILIARY OUTLET MANUALLY CONTROLLED**

# INDEPENDENT ADJUSTMENT OF TWO BURNERS

*Independent control of the two burners, one controlled by the thermostat and the other manually controlled.*

## MAIN FEATURES

Three-position control knob: temperature adjustment, pilot, off.

Thermoelectric flame failure device with restart interlock.

Adjustable thermostat, threshold proportional adjustment type, with minimum gas flow setting device.

Pressure regulator or, alternatively, gas flow setting device for the outlet controlled by the thermostat.

Manual control with three positions: OFF - MINIMUM - MAXIMUM (or, alternatively, OFF - ON) with minimum gas flow setting device for the auxiliary outlet.

Adjuster for gas flow to the pilot burner.

Inlet pressure test point.

Pressure test point on the outlet controlled by the thermostat.

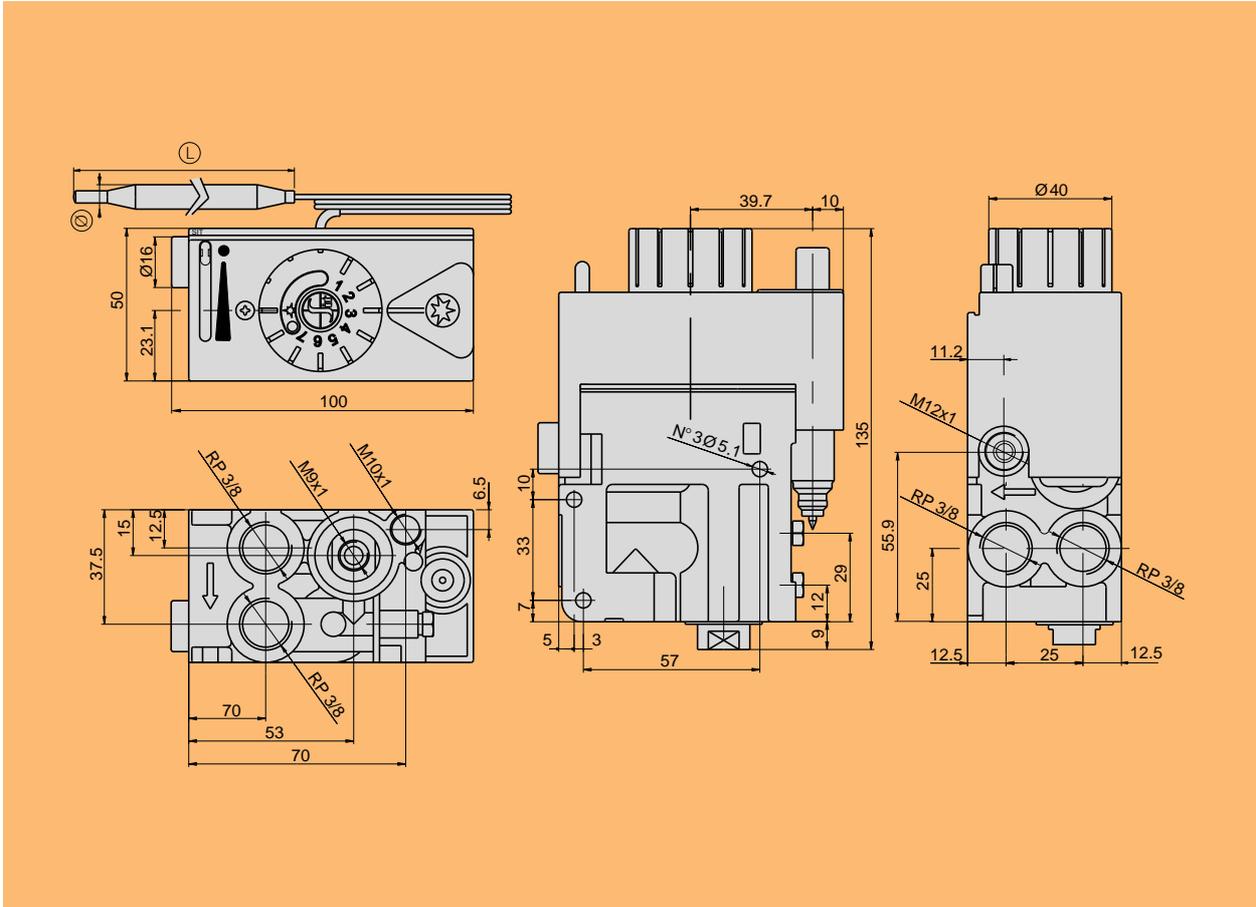

Inlet filter and pilot.

Connections:

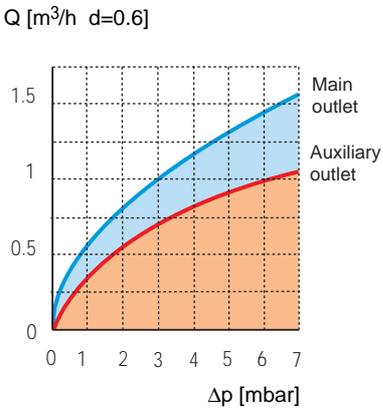

- inlet: side or bottom
- outlet controlled by the thermostat: side or bottom
- auxiliary outlet: side

*On request, the valve can be supplied in a version with one outlet only, with manual override for the thermostat function.*

# DIMENSIONS

# FLOW RATE AS A FUNCTION OF PRESSURE DROP

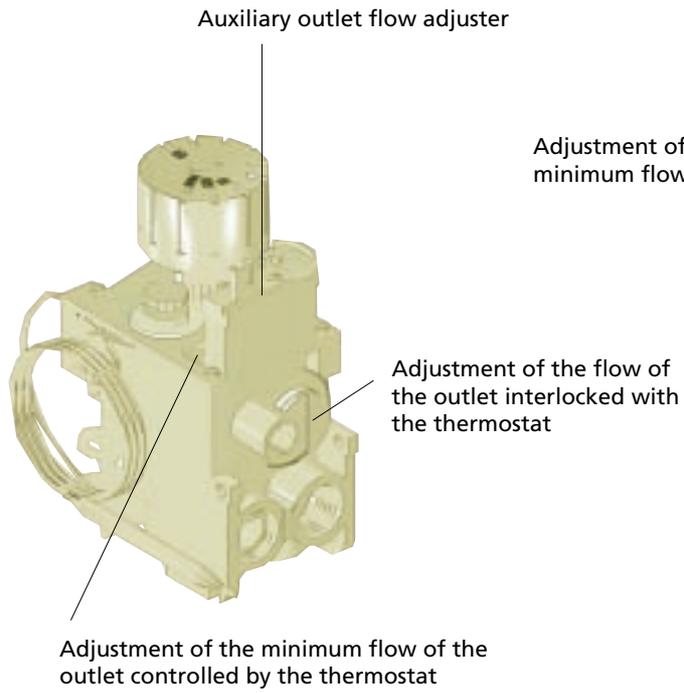

Gas flow rate Q (15°C, 1013.25 mbar) as a function of pressure drop Δp between inlet and outlet.

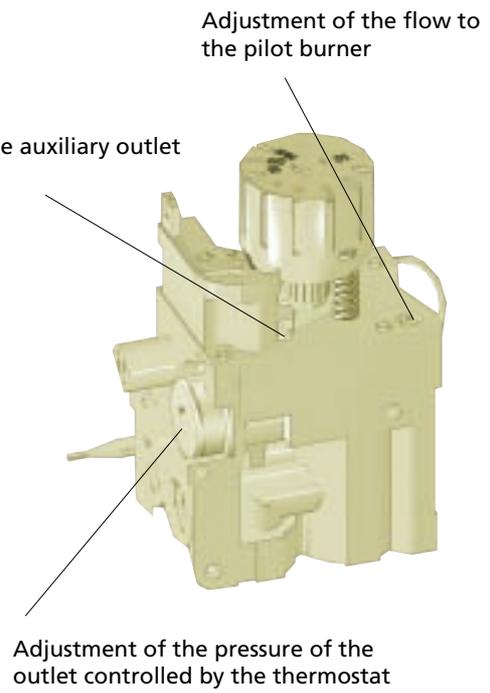

|                     | Main outlet               | Auxiliary outlet          |             |
|---------------------|---------------------------|---------------------------|-------------|
| II Family (d = 0.6) | Q = 1.3 m <sup>3</sup> /h | Q = 0.9 m <sup>3</sup> /h | Δp = 5 mbar |

## ADJUSTMENTS

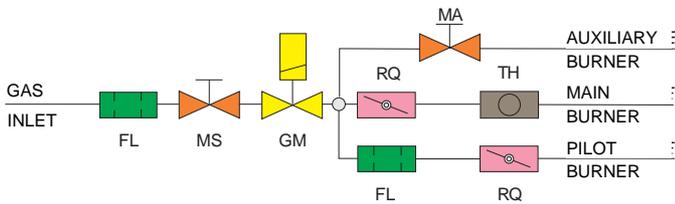

VERSION WITH FLOW ADJUSTER

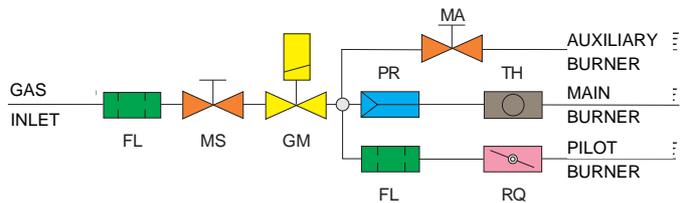

VERSION WITH PRESSURE REGULATOR

## FLOW DIAGRAMS

Version without pressure regulator

Version with pressure regulator

Version with one outlet only and manual override of the thermostat function
